## **Our Mission**

**At Farms at Work, we believe that communities need secure access to food and farm products into the future.**

**Our job is to help make that happen, along with our partners in east central Ontario and across the province.**

**How? We are committed to...**

- **Providing opportunities for learning and mentorship in agriculture**
  - **Providing opportunities for the public to increase understanding and appreciation of farming, food systems and community food security**
  - **Protecting the environment through researching, demonstrating and supporting food and farming systems that conserve or restore ecosystem health**
  - **Protecting farmland by acquiring interests in, managing and facilitating access to farmland for farmers**
-
